

NEW HORIZON PUBLIC SCHOOL
INDIRANAGAR, BANGALORE - 08
FIRST TERMINAL EXAMINATION – SEPTEMBER 2025
COMPUTER STUDIES

STD: VI
DATE: 02/09/25

MAX MARKS: 80
TIME: 2 HRS.

Answers to this Paper must be written on the paper provided separately.

*You will not be allowed to write during the first **15** minutes*

This time is to be spent in reading the question paper.

The intended marks for questions or parts of questions are given in brackets [].

SECTION A

Question 1

[16]

Choose the correct answer and write the correct option:

- (i) Which of the following best describes a mainframe computer.
 - (a) Uses a single chip processor
 - (b) Built mainly for gaming
 - (c) It is also called a PC
 - (d) Capable of processing large amounts of data and supporting multiple users simultaneously
- (ii) A small computer fixed inside a larger machine is called a _____.
 - (a) Embedded computer
 - (b) Microcomputer
 - (c) Minicomputer
 - (d) Mainframe computer
- (iii) The high level language that is table-driven is _____ and the one that uses natural language and is used in AI research is _____.
 - (a) 4GL , 5GL
 - (b) 3GL , 4GL
 - (c) 2GL , 5GL
 - (d) 2GL , 4GL

- (iv) Identify an example of a Gaming console.
 - (a) PDP-8
 - (b) VAX computer
 - (c) Xbox
 - (d) CRAY
- (v) Identify one common feature of binary language and assembly language.
 - (a) They do not require a translator
 - (b) They use mnemonic codes
 - (c) They are machine dependent
 - (d) Their codes are completely written in bits
- (vi) Decoding of a program means _____.
 - (a) Converting machine code to program code
 - (b) Dry-running the program
 - (c) Converting program code to machine code
 - (d) Writing the same program in a different high-level language
- (vii) The translator that works while the program is being executed is _____.
 - (a) Compiler
 - (b) Interpreter
 - (c) Both the translators
 - (d) No translator
- (viii) Identify the language that uses a compiler.
 - (a) BASIC
 - (b) Python
 - (c) C++
 - (d) None of the above
- (ix) Identify the output of the following program segment:
a,A=5,3
print(a)
 - (a) 3
 - (b) 5

- (c) Syntax error
- (d) 5,3
- (x) Identify the output of the following program segment:

```
n=6/2  
m=6//2  
print(n , m)
```

 - (a) 3.0 3
 - (b) 3.0 , 3
 - (c) 3 3.0
 - (d) 3 , 3.0
- (xi) The outcome of print (3**2) is _____ and print (3*2) is _____.
 - (a) 6 , 9
 - (b) 9 , 6
 - (c) 6.0 , 6
 - (d) None of the above
- (xii) In python, the relational operator for 'not equal to' is _____ and the operator '=' is called an _____ operator.
 - (a) != , equality
 - (b) <> , comparison
 - (c) ≠ , equal to
 - (d) != , assignment
- (xiii) Identify an invalid datatype of python.
 - (a) int
 - (b) float
 - (c) str
 - (d) boolean
- (xiv) A condition in python always results in _____.
 - (a) Numbers
 - (b) greater or smaller
 - (c) True or False
 - (d) Nothing

- (xv) In Python, if the condition in an 'if' statement is not true, what happens to the indented code under it?
- (a) It runs normally
 - (b) It is skipped
 - (c) It causes an error
 - (d) It becomes a comment
- (xvi) Identify the condition that checks whether an integer n is a single digit number assuming that the entered number is a positive number.
- (a) $n > 0$
 - (b) $n < 10$
 - (c) $n \leq 9$
 - (d) Both (b) and (c)

Question 2

Answer **any 4** of the following questions.

- (i) Name any four touchscreen gestures. **[2]**
- (ii) Differentiate between merging cells and splitting cells in MS Word. **[2]**
- (iii) Correct the errors in the following code that accepts the school name as string data. **[2]**

```
p=input("Enter your school name")  
if p=NHPS  
print("My school")
```
- (iv) Name any two supercomputers developed in India. Write any one application of a supercomputer. **[2]**
- (v) Write the syntax of the 'if...else' statement. **[2]**

Question 3

State whether the following variables are valid or invalid. Give reasons if they are invalid.

- (1) 2ndvalue **[1]**
- (2) elif **[1]**
- (3) _count **[1]**
- (4) name#3 **[1]**

Question 4

The following table shows the winners of a State Level Athletic Meet from an ICSE school. Observe the table carefully and answer the questions that follow.

Sl. No.	Name	Sport	Medal	Points
1	Ananya	Long Jump	Gold	20
2	Amit	Shot Put	Bronze	10
Total Points				

- (a) Write the number of rows and columns in the table. [1]
- (b) Write the horizontal and vertical alignment of 'Medal' and 'Bronze'. [1]
- (c) Write the formula to get the total points to be displayed in the shaded cell. [1]
- (d) Name the marked components 1 and 2. [1]

SECTION B

Question 5

Write **any 4** of the following programs using conditional statements.

- (a) In an apartment, the water meter reading is checked measured every morning. Accept today's meter reading (in litres) and yesterday's meter reading (in litres). Calculate how much water was used. If more than 500 litres were used, display "Too much water used today, check for leakage". Otherwise, display "Water usage is normal". [5]
- (b) Accept the measurement of an angle and display whether it is an acute angle, obtuse angle or a right angle. [5]

(An acute angle is less than 90° , a right angle is exactly 90° , and an obtuse angle is more than 90° but less than 180° .)

- (c) Accept the Computer marks obtained by a student in two different internal tests each out of 10. Display the double of the highest mark. [5]

Example : Input	Example : Input
Marks in Internal test 1 = 8	Marks in Internal test 1 = 7
Marks in Internal test 2 = 9	Marks in Internal test 2 = 7
Marks = 18 (which is 9×2)	Marks = 14 (which is 7×2)

- (d) The Government of India presents prestigious awards in various fields to honour excellence and outstanding contribution. Accept an area of excellence from the user as 'sports' or 'cinema'. Display the name of the highest award given in that field. Refer to the table given below: [5]

Field	Award
Sports	Major Dhyan Chand Khel Ratna Award
Cinema	Dadasaheb Phalke Award

For any other input, display the message 'Award information not available for this area'.

- (e) Accept a 2-digit number and check whether it is a spy number or not. A number is said to be a Spy number if the sum of its digits is equal to the product of its digits. [5]

Example: Input : 22	Input : 45
Output : 22 is a spy number (because $2+2=2*2$)	Output : 45 is not a spy number (because $4+5 \neq 4*5$)

Question 6

Write **any 4** of the following programs using a conditional statement.

- (a) Accept the name of a colour and display the significance of that colour in the Indian flag. [7]
- (b) Accept the total bill amount for a grocery order placed using an app. The app charges ₹30 as delivery fees if the bill amount is [7]

less than ₹200. If the bill amount is ₹200 or more, delivery is free. Based on the input, display the total bill amount, delivery charges, and the final amount to be paid.

Input : 180 Output:Total Bill Amount : 180 Delivery Charges : 30 Final Amount : 210	Input : 250 Output:Total Bill Amount : 250 Delivery Charges : 0 Final Amount : 250
--	---

- (c) Accept the cost price and selling price of an item. Check whether the shopkeeper has made a profit, a loss, or no profit/no loss. If there is a profit, display the profit amount. If there is a loss, display the loss amount. If the cost price and selling price are the same, display the message "No profit, no loss." **[7]**

profit amount = selling price – cost price

loss amount = cost price – selling price

- (d) Accept the radius (R) of a circle and display the circumference or the area of the circle based on the user's choice. **[7]**

$$\left. \begin{array}{l} \text{Area of a circle} = \pi R^2 \\ \text{Perimeter of a circle} = 2 \pi R \end{array} \right\} \pi = \frac{22}{7}$$

- (e) Accept time in 24 - hour format in two different variables as number of hours and number of minutes. Display the time in 12 hour format followed by a.m. or p.m. **[7]**

Example :

Input : 10 : 30 Output : 10 : 30 a.m.	Input : 15 : 45 Output : 3 : 45 p.m.
--	---
